EDUCATION

B.Tech in CSE (AKTU) — Sep 2024 – July 2028
ABES Engineering College, Ghaziabad — CGPA: 8.41/10

Class 12th (ICSE) — 2024
Little Flower School, Gorakhpur — 91.75%

Class 10th (ICSE) — 2022
Little Flower School, Gorakhpur — 92.6%

TECHNICAL SKILLS

Languages: Java 8/11/17, JavaScript (ES6+), SQL, HTML5, CSS3
Frontend: React.js, React Hooks, React Router, REST API Integration, Responsive Design
Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, RESTful APIs
Databases: MySQL, H2, Hibernate ORM, JDBC
DevOps & Cloud: Git, GitHub, Railway, Vercel, Maven
Testing & Tools: JUnit 5, Postman, IntelliJ IDEA, VSCode

PROJECTS

SmartHire – Job Application Tracker — React.js, Spring Boot, Spring Security, MySQL, JWT, Railway, Vercel
Live Demo | *GitHub*

- Engineered a production-deployed full-stack Job Application Tracker with JWT-based authentication, enabling users to securely manage job applications across 4 status stages — Applied, Interview, Offer, and Rejected.
- Implemented Spring Security filter chain with BCrypt password hashing and stateless JWT token validation, securing 8+ protected REST API endpoints against unauthorized access.
- Developed 15+ RESTful APIs following Controller-Service-Repository architecture with strict user-specific data isolation, achieving zero cross-user data leakage across 5 core CRUD modules (Jobs, Users, Reminders, Analytics, Export).
- Integrated Spring Data JPA and Hibernate ORM with MySQL for persistent storage across 3+ entity models, including bidirectional relationships (User → Jobs) with foreign key constraints ensuring referential integrity.
- Built React.js frontend with 6+ interactive features — real-time search, dynamic status filtering, follow-up reminders, AI assistant, live job feed, and a statistics dashboard visualizing application metrics using Recharts.
- Deployed full-stack application across 2 cloud platforms — backend on Railway, frontend on Vercel — with automated CI/CD via GitHub, maintaining 100% uptime since launch.

Blogging Application — React.js, Spring Boot, MySQL, Hibernate

- Developed a full-stack blogging platform with 3 user roles (Admin, Author, Reader), enabling users to create, manage, and publish blog posts through a responsive React.js interface.
- Built 10+ RESTful backend APIs using Spring Boot and Spring MVC following Controller-Service-Repository architecture for modular, maintainable code.
- Implemented complete CRUD functionality across 4 core entities (Posts, Comments, Categories, Users) using Spring Data JPA, Hibernate ORM, and MySQL for persistent data management.
- Integrated React.js frontend with 10+ Spring Boot REST APIs, enabling seamless client-server communication with real-time UI updates across all blog operations.

ACHIEVEMENTS

- Won **GFG 60 Days POTD Challenge** conducted by GeeksforGeeks in collaboration with NPCI.
- Selected in **Top 20 out of 481 teams** at HCL–GUVI Hackathon, ABES Engineering College.
- Achieved **Top-4 rank** on the Kaggle leaderboard in the Employee Burnout Score Prediction competition.

CERTIFICATIONS

Full Stack Development – Udemy — Aug 2025 – Nov 2025
GeeksforGeeks 60 Days POTD Challenge – GeeksforGeeks & NPCI — Feb 2026 – Apr 2026
EDA (Exploratory Data Analysis) – Nasscom | HCLTech — Aug 2026 – Sep 2026

EXTRACURRICULAR ACTIVITIES

Competitive Programming – LeetCode — Active on **LeetCode** (anmoltech7061) — earned the **100 Days Badge 2026** with a max streak of 27 days and 127 total active coding days.

Competitive Programming – CodeChef — Active on **CodeChef** (anmolsrivas) — rated **1264 (Div 4, 1★)** with a highest rating of 1320.

Hackathon — Participated in **HCL–GUVI Hackathon** at ABES Engineering College — selected among **Top 20 out of 481 teams**.

Kaggle — Competed in the **Employee Burnout Score Prediction** challenge on Kaggle — ranked in the **Top 4** on the leaderboard.
